Kentucky Drive-thru testing

TEAM KENTUCKY

Drive-thru testing is now open to all Kentuckians who would like a COVID-19 test at participating locations.

To register for a test, to find a location, and for more information visit KrogerHealth.com/CovidTesting or call 1-888-852-2567 (select option 1, then option 3).

The goal of the partnership with the Commonwealth of Kentucky and Kroger is to conduct 20,000 tests over the next five weeks. The state, Kroger and other partners expect to be able to handle about 250 vehicles per day per site at all locations.

· First, registrants will select a testing location and appointment time that works for them.

· Next, registrants will receive an email confirmation with pre-appointment paperwork to complete.

· When a person arrives for their test, they should have their photo ID ready and should leave their window rolled up until a health care practitioner comes to the car for the test.

· Test results are expected within approximately 48-hours.

Other project partners include: Kroger Health, UPS, Gravity Diagnostics, Kentucky Division of Emergency Management, Kentucky Department for Public Health, Kentucky State Police, Kentucky Transportation Cabinet, Kentucky National Guard.
