SPAIN'S CAP STRATEGIC PLAN. REGIONAL PERSPECTIVE

The CAP Strategic Plan for Spain 2023-2027 is the result of more than three years of in-depth diagnostic, analysis and planning work that has been characterised by a continuous and constant dialogue with all stakeholders.

In particular, in accordance with Spain's distribution of competences, with the 17 Autonomous Communities

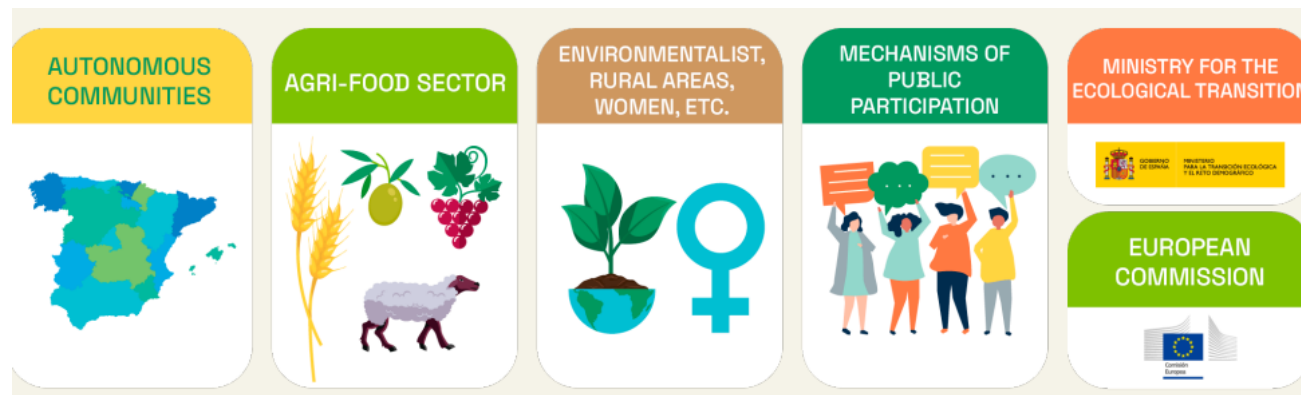

DIAGNOSIS AND ASSESSMENT OF THE DIFFERENT SPECIFIC OBJECTIVES NEEDS

During the first stage of the development of the CAP Strategic Plan, about starting point diagnosis and assessment of the different specific objectives needs, more than 60 meetings were held:

23 of them with Autonomous Communities, 19 with professional agricultural organizations and agri-food cooperatives, 18 with environmentalist organizations, 5 with representatives of the agri-food industries and distribution and 2 with women's associations.

NEEDS ' PRIORISATION

- ▶ Following the analysis of the sector's needs, they were prioritised using a methodology developed by the Ministry.
- ▶ The Autonomous Communities were involved in this phase to ensure that regional specificities were taken into account:
 - ▶ At the national level, ensuring territorial coherence and coordination.
 - ▶ Territorial criteria, by the Autonomous Communities, with the possibility of regional interventions on the basis of their specific needs.

DESIGN OF THE INTERVENTION STRATEGY

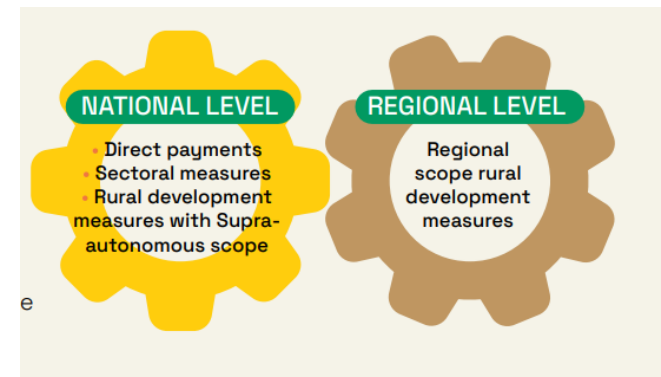

- ▶ Working groups were created together with the Autonomous Communities for regional interventions (7 meetings), first pillar interventions and conditionality (5 meetings), governance (2 meetings).
- ▶ Meetings were held with the professional agricultural organization, agri-food cooperatives and environmentalist organizations.
- ▶ Monographic sectoral conferences and bilateral meetings were held with all the autonomous communities during 2021 to design the intervention strategy and the different Plan's interventions.
- ▶ Proposals, questionnaires made for the autonomous communities and other documents were prepared for the negotiations.

STRATEGIC INTERVENTION

The Ministry of Agriculture, Fishing and Food and the Autonomous Communities have worked together in a coordinated way in the elaboration of the Plan:

- ▶ The farmer's income support and sectoral measures have a national scope. They were designed together with the autonomous communities.
- ▶ Most of the rural development measures have a regional scope and were designed by the autonomous communities, who best know the reality and needs in their territories. Furthermore, the autonomous communities gave a coordinated response to the needs identified at a national level in the design of the measures.

1 DECOUPLED PAYMENTS

A) DIRECT PAYMENTS INDEPENDENT OF PRODUCTION: → Enhanced conditionality

- Basic income support for sustainability
- Redistributive income support
- Income support for young farmers
- Eco-schemes (climate and environment)

2 SECTORAL MEASURES

A) DIRECT PAYMENTS FOR SPECIFIC SECTORS:

- Coupled payments
- Crop-specific payment for cotton

B) SECTORAL PROGRAMMES

3 RURAL DEVELOPMENT MEASURES

- Compensations for areas with certain constraints (e.g., mountain areas)
- Compensations for environmental and climate-related commitments (e.g., organic production)
- Compensations for the fulfilment of compulsory requirements (e.g., Natura 2000)
- Investments (agricultural, environmental, basic services, etc.)
- Young/new farmers and rural start-ups
- LEADER
- Cooperation among actors
- Knowledge exchange and dissemination of information
