

PROPHYLACTIC CANCER RISK REDUCTION SURGERY

Effective Date: May 14, 2020

Review Dates: 8/05, 4/06, 2/07, 7/07, 2/08, 10/08,
2/09, 2/10, 2/11, 2/12, 2/13, 2/14, 2/15, 2/16, 2/17,
2/18, 2/19, 2/20, 8/20, 8/21, 8/22, 8/23

Date Of Origin: 8/10/2005

Status: Current

I. POLICY/CRITERIA

Prophylactic surgery for cancer risk reduction is medically necessary as indicated below.

A. Prophylactic simple mastectomy is medically necessary when any ONE of the following criteria is met:

1. **Bilateral prophylactic mastectomy** in women with no personal history of breast cancer AND at least one of the following:
 - a. Member with known breast cancer pre-disposition (*BRCA1* or *BRCA2* or other strongly predisposing breast cancer susceptibility gene) deleterious mutation confirmed by genetic testing (See *Genetics: Counseling, Testing, and Screening medical policy #91540*); or
 - b. The member has atypical hyperplasia on biopsy as confirmed by a pathologist and is not interested in chemoprevention with selective estrogen receptor modulators (SERMS), i.e., tamoxifen and raloxifene; or
 - c. A family history of any of following:
 1. Two or more first-degree relatives on the same side of the family with breast cancer, at least one of whom received the diagnosis at age 50 years or younger;*
 2. One first-degree relative with breast cancer and **one** of the following*:
 - Two or more second-degree and/or third-degree relatives with breast cancer at least one of whom was diagnosed at age 50 years or younger; or
 - The diagnosis was before the age of 45 and one other relative with breast cancer at any age or
 - One or more relatives with ovarian cancer; or
 - The first-degree relative has bilateral breast cancer
 3. Two or more second degree relatives on the same side of the family with*:

- One with breast cancer and one with ovarian cancer
- Ovarian cancer

**Indications 1, 2 and 3 require evaluation of overall risk and discussion of the risks and benefits of all surgical and non-surgical options for risk reduction.*

- d. Women with large, ptotic, dense, or disproportionally sized breasts that are difficult to evaluate mammographically.
- e. A history of diffuse calcifications and multiple biopsies resulting in difficulty performing or interpreting diagnostic breast exams.

2. **Contralateral or bilateral prophylactic mastectomy** with personal history of breast cancer and one of the following indications:

- a. It is the opinion of the surgeon and preference of the member that in order to achieve symmetry that bilateral mastectomy would produce the best outcome; or
- b. The member has a family history of any of following:
 - 1. Two or more first-degree relatives on the same side of the family with breast cancer, at least one of whom received the diagnosis at age 50 years or younger;*
 - 2. One first- degree relative with breast cancer and **one** of the following*:
 - Two or more second-degree and / or third-degree relatives with breast cancer at least one of whom was diagnosed at age 50 or younger; or
 - The diagnosis was before the age of 45 and one other relative with breast cancer at any age or
 - One or more relatives with ovarian cancer; or
 - The first degree relative has bilateral breast cancer
 - 3. Two or more second degree relatives on the same side of the family with*:
 - One with breast cancer and one with ovarian cancer
 - Ovarian cancer

**Indications 1, 2 and 3 require evaluation of overall risk and discussion of the risks and benefits of all surgical and non-surgical options for risk reduction.*

- c. Women with multiple primary breast cancers in the sentinel breast.
- d. Women diagnosed with invasive breast cancer at age 45 years of age or younger.
- e. Women who are confirmed *BRCA 1* or *BRCA 2* mutation carriers. (See Genetics: Counseling, Testing, and Screening Policy #91540)
- f. Women with lobular carcinoma in situ or atypical hyperplasia in the ipsilateral breast.
- g. Women with invasive lobular carcinoma of the ipsilateral breast.
- h. A history of diffuse calcifications and multiple biopsies resulting in difficulty performing or interpreting diagnostic breast exams.

Covered treatment options are simple mastectomy and simple mastectomy with reconstruction (breast implant).

B. Prophylactic oophorectomy is medically necessary when at least one of following criteria is met:

- 1. Member who has been determined to be a member of a family with a hereditary ovarian cancer syndrome based on a family pedigree constructed by a genetic counselor or physician competent in determining the presence of an autosomal dominant inheritance pattern in which genetic testing is either not available or uninformative.
- 2. Member with a *BRCA* mutation; or a mutation associated with hereditary nonpolyposis colorectal cancer syndrome (HNPCC)
- 3. Member with a history of breast cancer, which is estrogen receptor (ER) positive, and who are premenopausal.
- 4. Member with a personal history of breast cancer and at least one first degree relative (e.g., mother, sister, daughter) with history of ovarian cancer; or
- 5. Member with one first degree relative (e.g., mother, sister, daughter) and one or more second degree relatives (e.g., maternal or paternal aunt, grandmother, niece) with ovarian cancer.

C. Prophylactic salpingo-oophorectomy is medically necessary when indications in the National Comprehensive Cancer Network (NCCN) Guidelines for Genetic/Familial High-Risk Assessment: Breast and Ovarian are met.

D. Prophylactic total gastrectomy for hereditary diffuse gastric cancer is medically necessary for members with known mutations in the *CDH1* gene

and a positive family history of gastric cancer under the age of 50.

E. **Prophylactic hysterectomy** is medically necessary when at least one of the following criteria is met:

1. Patients with known hereditary nonpolyposis colon cancer (HNPCC) who have completed childbearing.
2. Patients with an HNPCC associated mutation that have completed childbearing.

F. **Prophylactic thyroidectomy**: See *Thyroid-Related Procedures (#91621)*

II. MEDICAL NECESSITY REVIEW

Required Not Required Not Applicable

III. APPLICATION TO PRODUCTS

Coverage is subject to member's specific benefits. Group specific policy will supersede this policy when applicable.

- ❖ **HMO/EPO**: *This policy applies to insured HMO/EPO plans.*
- ❖ **POS**: *This policy applies to insured POS plans.*
- ❖ **PPO**: *This policy applies to insured PPO plans. Consult individual plan documents as state mandated benefits may apply. If there is a conflict between this policy and a plan document, the provisions of the plan document will govern.*
- ❖ **ASO**: *For self-funded plans, consult individual plan documents. If there is a conflict between this policy and a self-funded plan document, the provisions of the plan document will govern.*
- ❖ **INDIVIDUAL**: *For individual policies, consult the individual insurance policy. If there is a conflict between this medical policy and the individual insurance policy document, the provisions of the individual insurance policy will govern.*
- ❖ **MEDICARE**: *Coverage is determined by the Centers for Medicare and Medicaid Services (CMS) and/or the Evidence of Coverage (EOC); if a coverage determination has not been adopted by CMS, this policy applies.*
- ❖ **MEDICAID/HEALTHY MICHIGAN PLAN**: *For Medicaid/Healthy Michigan Plan members, this policy will apply. Coverage is based on medical necessity criteria being met and the appropriate code(s) from the coding section of this policy being included on the Michigan Medicaid Fee Schedule located at: http://www.michigan.gov/mdch/0,1607,7-132-2945_42542_42543_42546_42551-159815--,00.html. If there is a discrepancy between this policy and the Michigan Medicaid Provider Manual located at: http://www.michigan.gov/mdch/0,1607,7-132-2945_5100-87572--,00.html, the Michigan Medicaid Provider Manual will govern. For Medical Supplies/DME/Prosthetics and Orthotics, please refer to the Michigan Medicaid Fee Schedule to verify coverage.*

IV. DESCRIPTION

Prophylactic Cancer Risk Reduction Surgery Includes:

- Prophylactic Hysterectomy
- Prophylactic Mastectomy
- Prophylactic Oophorectomy
- Prophylactic Salpingo-oophorectomy
- Prophylactic Thyroidectomy See *Thyroid-Related Procedures (#91621)*
- Prophylactic Total Gastrectomy

V. CODING INFORMATION

A. Mastectomy

ICD-10 Codes that apply:

- Z15.01 Genetic susceptibility to malignant neoplasm of breast
- Z15.02 Genetic susceptibility to malignant neoplasm of ovary
- Z15.09 Genetic susceptibility to other malignant neoplasm
- Z40.01 Encounter for prophylactic removal of breast
- Z40.09 Encounter for prophylactic removal of other organ
- Z40.8 Encounter for other prophylactic surgery
- Z41.8 Encounter for other procedures for purposes other than remedying health state
- Z41.9 Encounter for procedure for purposes other than remedying health state, unspecified
- Z80.3 Family history of malignant neoplasm of breast
- Z80.41 Family history of malignant neoplasm of ovary
- Z80.49 Family history of malignant neoplasm of other genital organs
- Z80.8 Family history of malignant neoplasm of other organs or systems
- Z80.9 Family history of malignant neoplasm, unspecified
- Z85.3 Personal history of malignant neoplasm of breast
- Z85.40 Personal history of malignant neoplasm of unspecified female genital organ
- Z85.43 Personal history of malignant neoplasm of ovary

CPT/HCPCS Codes:

- 19303 Mastectomy, simple, complete

B. Oophorectomy

ICD-10 Codes that apply:

- Z15.01 Genetic susceptibility to malignant neoplasm of breast
- Z15.02 Genetic susceptibility to malignant neoplasm of ovary
- Z15.09 Genetic susceptibility to other malignant neoplasm
- Z40.02 Encounter for prophylactic removal of ovary
- Z40.03 Encounter for prophylactic removal of fallopian tube(s)
- Z40.09 Encounter for prophylactic removal of other organ
- Z40.8 Encounter for other prophylactic surgery
- Z41.8 Encounter for other procedures for purposes other than remedying health state
- Z41.9 Encounter for procedure for purposes other than remedying health state, unspecified

Z80.0	Family history of malignant neoplasm of digestive organs
Z80.3	Family history of malignant neoplasm of breast
Z80.41	Family history of malignant neoplasm of ovary
Z80.49	Family history of malignant neoplasm of other genital organs
Z80.8	Family history of malignant neoplasm of other organs or systems
Z80.9	Family history of malignant neoplasm, unspecified
Z83.71	Family history of colonic polyps
Z85.3	Personal history of malignant neoplasm of breast
Z85.40	Personal history of malignant neoplasm of unspecified female genital organ
Z85.43	Personal history of malignant neoplasm of ovary
Z85.44	Personal history of malignant neoplasm of other female genital organs
Z86.010	Personal history of colonic polyps

CPT/HCPCS Codes:

58661	Laparoscopy, surgical; with removal of adnexal structures (partial or total oophorectomy and/or salpingectomy)
58720	Salpingo-oophorectomy, complete or partial, unilateral or bilateral (separate procedure)
58940	Oophorectomy, partial or total, unilateral or bilateral;

C. Gastrectomy**ICD-10 Codes that apply:**

Z15.09	Genetic susceptibility to other malignant neoplasm
Z40.09	Encounter for prophylactic removal of other organ
Z40.8	Encounter for other prophylactic surgery
Z41.8	Encounter for other procedures for purposes other than remedying health state
Z41.9	Encounter for procedure for purposes other than remedying health state, unspecified
Z80.0	Family history of malignant neoplasm of digestive organs

CPT/HCPCS Codes:

43620	Gastrectomy, total; with esophagoenterostomy
43621	Gastrectomy, total; with Roux-en-Y reconstruction
43622	Gastrectomy, total; with formation of intestinal pouch, any type

D. Hysterectomy**ICD-10 Codes that apply:**

Z15.04	Genetic susceptibility to malignant neoplasm of endometrium
Z15.09	Genetic susceptibility to other malignant neoplasm
Z40.09	Encounter for prophylactic removal of other organ
Z41.8	Encounter for other procedures for purposes other than remedying health state
Z80.0	Family history of malignant neoplasm of digestive organs
Z80.8	Family history of malignant neoplasm of other organs or systems
Z83.71	Family history of colonic polyps
Z86.010	Personal history of colonic polyps

CPT/HCPCS Codes:

- 58150 Total abdominal hysterectomy (corpus and cervix), with or without removal of tube(s), with or without removal of ovary(s);
- 58180 Supracervical abdominal hysterectomy (subtotal hysterectomy), with or without removal of tube(s), with or without removal of ovary(s)
- 58200 Total abdominal hysterectomy, including partial vaginectomy, with para-aortic and pelvic lymph node sampling, with or without removal of tube(s), with or without removal of ovary(s)
- 58260 Vaginal hysterectomy, for uterus 250 grams or less;
- 58262 Vaginal hysterectomy, for uterus 250 grams or less; with removal of tube(s), and/or ovary(s)
- 58263 Vaginal hysterectomy, for uterus 250 grams or less; with removal of tube(s), and/or ovary(s), with repair of enterocele
- 58290 Vaginal hysterectomy, for uterus greater than 250 grams;
- 58291 Vaginal hysterectomy, for uterus greater than 250 grams; with removal of tube(s) and/or ovary(s)
- 58292 Vaginal hysterectomy, for uterus greater than 250 grams; with removal of tube(s) and/or ovary(s), with repair of enterocele
- 58294 Vaginal hysterectomy, for uterus greater than 250 grams; with repair of enterocele
- 58541 Laparoscopy, surgical, supracervical hysterectomy, for uterus 250 g or less;
- 58542 Laparoscopy, surgical, supracervical hysterectomy, for uterus 250 g or less; with removal of tube(s) and/or ovary(s)
- 58543 Laparoscopy, surgical, supracervical hysterectomy, for uterus greater than 250 g;
- 58544 Laparoscopy, surgical, supracervical hysterectomy, for uterus greater than 250 g; with removal of tube(s) and/or ovary(s)
- 58548 Laparoscopy, surgical, with radical hysterectomy, with bilateral total pelvic lymphadenectomy and para-aortic lymph node sampling (biopsy), with removal of tube(s) and ovary(s), if performed
- 58550 Laparoscopy surgical, with vaginal hysterectomy, for uterus 250 grams or less;
- 58552 Laparoscopy surgical, with vaginal hysterectomy, for uterus 250 grams or less; with removal of tube(s) and/or ovary(s)
- 58553 Laparoscopy, surgical, with vaginal hysterectomy, for uterus greater than 250 grams;
- 58554 Laparoscopy, surgical, with vaginal hysterectomy, for uterus greater than 250 grams; with removal of tube(s) and/or ovary(s)
- 58570 Laparoscopy, surgical, with total hysterectomy, for uterus 250 g or less;
- 58571 Laparoscopy, surgical, with total hysterectomy, for uterus 250 g or less; with removal of tube(s) and/or ovary(s)
- 58572 Laparoscopy, surgical, with total hysterectomy, for uterus greater than 250 g;
- 58573 Laparoscopy, surgical, with total hysterectomy, for uterus greater than 250 g; with removal of tube(s) and/or ovary(s)
